

## 4 FONCTIONS

**LUBRICATING – ANTI HUMIDITY – ANTI CORROSION – ANTI SEIZE**

### MAIN PROPERTIES

Lubricating - anti-seize:

- Lubricates mechanical parts thanks to its good penetrating power.
- Leaves a slight greasy film ensuring a protection against oxidation.
- Avoids creaking.

Anti-humidity - anticorrosion:

- Hunts away humidity and forms a protective and insulating film.
- Avoids dust and dirtiness deposits on metallic parts.

### APPLICATIONS

- Unseize, cleans, lubricates, protects and eliminates humidity quickly ;
- Standard uses: electrical and mechanical tools, hinges, locks...
- Garden, leisure: hunting and fishing articles, mowers, saws and shears...
- Cars: ignition circuit, cables, aerials, doors...
- Ideal for garages, vehicle fleet maintenance and industry.

### INSTRUCTIONS FOR USE

Shake before use.

Spray on the parts, wait few minutes, do it again if parts are very corroded.

### F+ : EXTREMELY FLAMMABLE PRODUCT

- **Use and store far from all flame, heat source, spark or working electric machine. Do not inhale. Operate by short pressures without long spraying. Ventilate after use.**
- **High-pressure spray. Protect from the sun. Do not expose to temperature over 50°C. Do not spray towards a flame or incandescent bodies.**
